## DETAILED ACTION

### *Election/Restrictions*

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-10, 25, 26, and 30, drawn to a beta-glucan containing processed cereal grain product.

Group II, claim(s) 11-24, 33, and 34, drawn to a method for producing a beta-glucan containing product.

2. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

3. The technical feature common to Groups I and II is the method for producing a beta-glucan containing product of Claim 11. However, evidence of lack of unity between the two groups is found in U.S. Patent No. 5,512,287 to Wang et al., where it is found to disclose the features of instant claim 11. Wang et al. teaches a method of producing a beta-glucan containing product (Column 3, lines 48-49) comprising heating the beta-glucan containing cereal grain in the presence of greater than approximately 50% water by weight to a temperature of 93°C, (Column 4, lines 53-56). Wang teaches using 7 kg oat groat with 49 kg water (Column 4, lines 53-54), which is greater than 50% by weight

of water to cereal grain. Wang further teaches drying the solids that were collected in a tray dryer (Column 4, lines 64-65).

4. As such, the special technical feature of the claimed invention is not found to define a contribution over the prior art, and the restriction is deemed proper.

5. A telephone call was made to Mr. Frank Occhiuti on 3/24/2009 to request an oral election to the above restriction requirement, but did not result in an election being made.

6. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

7. The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

8. The examiner has required restriction between product and process claims. Where applicant elects claims directed to the product, and the product claims are subsequently found allowable, withdrawn process claims that depend from or otherwise require all the limitations of the allowable product claim will be considered for rejoinder. All claims directed to a nonelected process invention must require all the limitations of an allowable product claim for that process invention to be rejoined.

9. In the event of rejoinder, the requirement for restriction between the product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103 and 112. Until all claims to the elected product are found allowable, an otherwise proper restriction requirement between product claims and process claims may be maintained. Withdrawn process claims that are not commensurate in scope with an allowable product claim will not be rejoined. See MPEP § 821.04(b). Additionally, in order to retain the right to rejoinder in accordance with the above policy, applicant is advised that the process claims should be amended during prosecution to require the limitations of the product claims. **Failure to do so may result in a loss of the right to rejoinder.** Further, note that the prohibition against double patenting rejections of 35 U.S.C. 121 does not apply where the restriction requirement is withdrawn by the examiner before the patent issues. See MPEP § 804.01.
